

"Mic Up Your Amp" Rebate

FREE MXL DX-2

Dual Capsule Variable Dynamic Microphone (a \$219 value*) with the purchase a new VOX AC30 C2 Amplifier in May

**Dial in your tone
with the new MXL DX-2 microphone!**

The MXL DX-2® is the first dual capsule dynamic microphone designed for guitar amps that allows you to tailor the sound from one capsule to the other and all points in between, so that you can easily customize your sound. The front of the microphone is a flat-faced, side-address design which places the microphone capsules close to the sound for optimal pickup, while the opposite side has the crossfade knob, making adjustments a breeze. Capsule 1's super cardioid large capsule design captures the warmth and fullness of your instrument while Capsule 2's cardioid small capsule offers superb mid-range and high end detail. So make sure your new Vox AC30 C2 is heard, just the way you like it!
