### Contents:

The Classic Tubes 2 update introduces 5 new microphones to the Slate Digital Virtual Microphone System. The FG-12, FG-800M, FG-M7, FG-269 and FG-67.

The **FG-12** emulates an Austrian classic known for being incredibly smooth and rich sounding. We chose an absolutely incredible mic to model that is the perfect representation of this famous tone.

The **FG-800M** emulates an older Japanese tube mic and is slightly fatter and darker than the stock FG-800. If you love the FG-800 but wish it was a tad less sibilant and bright, you're gonna love this.

The **FG-M7** takes one of the most famous dynamic vocal mics used by artists like Michael Jackson, and adds the tube stage of the classic 47 making it extremely punchy, crisp, with incredible mids that cut through the mix.

The **FG-269** emulates an extremely rare German classic that shares much of the same circuit as the 67, but has a different tube that makes it more open and clear.

The **FG-67** emulates a German classic known for being bold, slightly dark, and thick. This is amazing as a vocal mic, room mic, horn mic and piano mic.
