COMPLETE PACK FOR INSPIRED SOUND RECORDING

**Get 4x Verge Mics, the Impresser and 36 Synergy Core FX
FREE with the Discrete 8 Synergy Core**

MECHANISM:

1. Buy the Discrete 8 Synergy Core interface.
2. Get your free Verge modeling mics together with your audio interface.
3. The Impresser and the 13 Verge mic emulations will be automatically added to your user account. You will have to assign these features to your new audio interface from the Manage tab in the Antelope Launcher.

ON THE VERGE OF GREATNESS:

The Verge is a high-performance small diaphragm condenser microphone with a very articulate and transparent response. Its high SPL handling makes it ideal for recording brass, drums and cymbals as well as piano, strings and acoustic guitar.

The Verge comes with 13 mic emulations which take on the character of some of the finest small diaphragm dynamic mics in existence, delivering stunning detail and realism. When combined with the Discrete 8 Synergy Core audio interface, the emulations are processed via the Synergy Core technology which amazingly recreates numerous mic models with sub-millisecond latency & real-time monitoring.

WHAT'S SO IMPRESSIVE ABOUT THE IMPRESSER?

Recreated by the powerful Synergy Core technology, the Impresser is an extremely versatile compressor effect with a distinct signature sound.

The compression is adjusted by a wide range of control options including 19 different detector frequencies, 2nd and 3rd order harmonics, and for extreme dynamics control – the Nuke and “UK” mode.

ALL SYNERGY CORE EFFECTS INCLUDED IN THE PACK:

Mic Preamps:

Gyraf Gyratec IX
BA-31

Equalizers:

VEQ-1A
VEQ-HLF
VMEQ-5
