Get the Edge Duo, 4x Verge Modeling Mics and 50 Synergy Core FX

FREE with the Orion Studio Synergy Core

MECHANISM:

1. Buy the Orion Studio Synergy Core interface.
2. Get your free Edge Duo and Verge modeling mics together with your audio interface.
3. The Synergy Core FX and all the emulations included in the mics will be automatically added to your user account. You will have to assign these features to your new audio interface from the Manage tab in the Antelope Launcher.

CAPTURE THE TRUE SOUND WITH EDGE DUO:

This dual-membrane large-diaphragm condenser microphone captures vocals and instruments with pristine clarity, depth and detail, making it the perfect starting point for emulating a wide range of timeless studio microphones.

The Edge Duo comes with a total of 18 mic emulations, all meticulously measured from their hardware originals. Presenting you with new options during the recording session and the mixing phase, this microphone will make your sound stand out from the crowd.

ON THE VERGE OF GREATNESS:

The Verge is a high-performance small diaphragm condenser microphone with a very articulate and transparent response. Its high SPL handling makes it ideal for recording brass, drums, and cymbals, as well as piano, strings, and acoustic guitar.

The Verge comes with 13 mic emulations which take on the character of some of the finest small diaphragm dynamic mics in existence, delivering stunning detail and realism. When combined with the Orion Studio Synergy Core audio interface, the emulations are processed via the Synergy Core technology which amazingly recreates numerous mic models with sub-millisecond latency & real-time monitoring.

SYNERGY CORE EFFECTS INCLUDED IN THE PACK:

Mic Preamps:
Gyraf Gyratec IX
BA-31

Equalizers:
BAE-1023
VEQ-4K BROWN
NEU-W492
