ORION STUDIO SYNERGY CORE

THE COMPANION PIECE TO YOUR ANALOG SYNTHS

With 50 Real-time FX
Emulating Studio Hardware

We encourage you to stay home and keep creating by offering you a \$1000 “Together We Create” plugins voucher. We hope to make the start of your Antelope journey an inspiring one, by giving you the chance to choose effects with a total value of \$1000 and get them all for free. Now is the time to learn how to use as many of our hardware-modeled studio effects as possible. See all activities centered around helping you stay creative during these challenging times, [here](#).

**Buy now and get
50 Real-time Effects
Emulating Studio Hardware and
a \$1000 “Together We Create”
plugins voucher**

Campaign period
01.4.2020 – 31.5.2020

Price
\$2795

How it works

1. After purchase, the 50 Real-time FX will be automatically added to your user account and will be available to use in the Control Panel.
2. Upon activation of the device you will receive an email with a unique coupon code for the \$1000 “Together We Create” plugins voucher*.

* Plugins include AFX2DAW and all effects in the expandable FX library of the device, except Auto-Tune Synergy.

Why your analog synths would love the Orion Studio Synergy Core?

- **Exclusive feature:** the DC-coupled inputs are a feature that very few other interfaces can offer. It allows capturing control voltage (CV) – an analog method of controlling synthesizers, drum machines and other similar equipment. Combine it with the Antelope Routing Matrix and you can use the Orion Studio Synergy Core as a CV-routing hub.
- **Exclusive feature:** the Direct-In lets you bypass the preamp design and record directly through the AD converter without the preamp architecture affecting your signal. Combined with pro-class conversion by virtue of our high-spec converters and clocking technology, and you have the perfect tool to record your treasured synths.
- No need for a CV sequencer! The **16 DC-coupled line outputs** on DB25 connectors allow you to control your analog synthesizers by sending CV/Gate from your DAW via a CV generating software to the outputs, then directly to your CV-compatible synths. Should you decide to process via external hardware or go to an external 16-channel mixer you can do it with pristine sound quality.
- This **multichannel interface** lets you record high-impedance instruments, such as the electric guitar, through four Hi-Z inputs and reamp your guitar recording via your favorite guitar amps with the reamp outputs. Record your vocals through the **discrete transistor ultra-linear preamps** offering ultra-low noise and distortion with 75 dB gain. This is accomplished without adding unnecessary color to your sound.
- The 6xDSP and 2xFPGA **Synergy Core processing module** will help you record dry or wet with FX and monitor in real-time while placing zero load on your CPU. Reduce your buffer size and round-trip latency for monitoring. Apply the effects in both production and post-production.
- **Cross-platform** – Thunderbolt™ 3 and USB 2.0 with custom-built Mac and Windows drivers for low-latency performance.
- The Orion Studio Synergy Core is on **Ableton’s list of tested devices with CV Tools**.

Included FX

Mic Preamps

- Gyraf Gyratec IX
- BA-31

Equalizers

- BAE-1023
- VEQ-4K BROWN
- NEU-W492
- VEQ-STU 089
- Clear Q
- VEQ-1AVEQ-1A
- VEQ-HLF

Compressors

- X903
- FET-A78
- SMT-100A
- Stay-Levin
- VCA160
- ALT-436C

Utility Effects

- Auraverb
- PowerEX
- PowerGate
- Master De-Esser

Guitar Amps

- Plexi 59 (UK)
- Bass SuperTube VR
- Darkface 65 (US)
- Tweed Deluxe (US)
- Marcus II (US) Lead

Guitar Cabinets

- Darkface 65 2×12
- Top30 2×12
- Modern 4×12
- Bluelux 1×12
- England 4×12
