How it works

1. Buy a Synergy Core audio interface.
2. The Edge Solo modeling microphone will be delivered to you together with the interface.
3. The "Analog Curator FX Bundle" effects will be automatically added to your user account, in addition to the standard effects already included with your interface, and will be available to use in the Control Panel.
4. After activating the interface, you will receive an email with a serial number for the full version of Bitwig Studio*. After registration in the Bitwig website, you will be able to download the software and activate Bitwig Studio.
5. After activating the interface, you will also receive an email with details about the exclusive promotional FX Bundles.

*The license for Bitwig Studio includes 12 months of free upgrades. It is part of the special offer and as such it can't be resold as a stand-alone.

NB: The above mechanics do not apply to b-stock or previously activated devices and the user will have to contact help@antelopeaudio.com in order to receive their promotional goods.
