$1 450 Plugins Credit

36 PLUGINS INCLUDED

Discrete 4 Synergy Core

$750 Plugins Credit

36 PLUGINS INCLUDED

From Fabled Classics to Collector's Items

You can't go wrong with a faithful emulation of a classic analog piece of studio hardware. To stay true to their heritage, all vintage plugins are recreated down to component level with their characteristic non-linear behavior.

How about a less frequently emulated analog unit that has been retired for long time or was simply hard to find? Once we tracked their traces, the specific analog circuitry was translated to a software emulation that you can now apply to your projects and add a unique element to your production.

The Synergy Core Audio Interfaces

All Synergy Core interfaces will help you take the leap to pro audio and create studio-quality productions at home, in the studio or on the go.

High-Fidelity Sound

The innovative clocking technology and jitter management algorithms found in all our interfaces, in combination with the preamp design and high-spec AD/DA converters are key to the signature Antelope sound.

36 or 50 Included Plugins

The collection is largely composed of software emulations of vintage analog gear found in world-renowned recording studios. All the essentials are included - compressors, equalizers, preamps, guitar amps & cabs, and more.

Onboard Processing Platform

The Synergy Core offloads all processing to the interface, thus saving your host CPU, while allowing direct monitoring with plugins in real-time with no perceived latency - a feature widely used in live performances.

Flexible Creative Process

The comprehensive routing and advanced mixers for monitoring & summing will help you establish a creative hybrid workflow with all gear around you and your onboard plugins.

Cross-Platform Connectivity

All our interfaces support Thunderbolt and USB with custom-built Mac and Windows drivers for low-latency performance.

How It Works

1. Buy a Synergy Core audio interface.

2. Upon activation of the interface, you will receive an email with a code for your plugins credit which you will be able to spend in the Antelope Software Store.
