With iLoud Micro Monitor, you can hear the truth in your music anytime and everywhere. The smallest active studio reference monitoring system in the world, iLoud Micro Monitor provides you with ultra-accurate true linear frequency response with no coloration, and does so in every listening environment, especially in home and project studios.

iLoud Micro Monitors stunned an industry. Producers and engineers at every level marveled at the performance coming from such a small setup, so IK challenged our team to push its concept even further - to design a new compact speaker to rival 5", 6" and even 8" monitors. The result is iLoud MTM super nearfield studio monitor, and it changes everything about the sound, accuracy and convenience of reference monitors in today's modern studio.
