**Omnisphere 2** is Spectrasonics' flagship synthesizer and is known throughout the world as the most elegant, flexible and comprehensive virtual instrument ever. Top Artists rely on Omnisphere as an essential source of synth-inspiration.

**The Fame Series** showcases Omnisphere's powerful synth engine in three patch libraries that celebrate classic, modern, and Indie synth tones from famous songs. These patches feature familiar sounds that serve as great starting points for your new, organic compositions.

Choose from one of these Fame Series libraries:

**The Fame Series: Classic Sounds** spotlights the golden age of synth tones — from the 70s into the early 90s. Borrowing from ABBA, Depeche Mode, Kraftwerk, Gary Numan, Tears for Fears, Jean-Michel Jarre, Joy Division and more, this collection celebrates synth pioneers of the last century.

**The Fame Series: Modern Pop** for Omnisphere 2 pays homage to famous synth sounds used in popular music from the 90s to today. Inspired by Billie Eilish, Kanye West, Tyler, the Creator, The Weeknd, Frank Ocean and Lady Gaga, these sounds live for the spotlight!

**The Fame Series: Indie Pop** for Omnisphere 2 focuses on cutting-edge synth tones inspired by recent indie releases from Tame Impala, Tycho, Kavinsky, Radiohead, MGMT, The 1975, Com Truise, LCD Soundsystem, and many more. Amazing sounds with an alternative attitude!
