GENOME Ultimate Edition Takeover

For a limited time, buy and register any of Two notes' class-leading solutions and get GENOME Ultimate Edition valued at over 250€/ \$ absolutely free! Two notes' latest carrier class software ecosystem has been expertly engineered to deliver the pinnacle in end-to-end tone shaping and includes the GENOME Stock offering plus every Premium Component they've released to date! Packing an ever-growing roster of amplifiers, pedals, class-leading virtual cabinets and essential STUDIO FX, GENOME is your first - and final - destination for the ultimate in-the-box or hybrid backline. You'd better act quickly though, come December 10th the offer terminates so there's no time like the present to level-up your hardware and digital backline for less!

The Two notes Line-Up

Within their roster, there is something for every player. First, Captor: the industry standard reactive load box, attenuator and Amp DI, engineered for the studio and live player to effortlessly capture their tube amp whilst running it at its absolute sweet spot. Next, the iconic Captor X: a next generation DSP-loaded reactive load box that gives you everything you need for flawless tone, whatever the situation demands. Then there's the ReVolt Series, 3 channel all-analog guitar and bass amp simulators engineered with a singular mission: to empower players with the ultimate in a pure, unadulterated foundation tone. Next - and new-for-2023 - there's OPUS, an end-to-end tone-shaping powerhouse that guarantees to elevate any board to legendary status.
